PROFESSIONAL EXPERIENCE

CIS Peer Tutor *(01/2024 – Current)*

Bellevue University, Bellevue, NE

- Lead 150+ tutoring sessions across 50+ computer science courses, helping students improve their understanding and grades.
- Design personalized learning plans based on individual student needs and instructor feedback.
- Assist 100+ students with assignments, test preparation, and configuring lab environments.

Web Development & IT Support Specialist *(10/2022 - 11/2023)*

Pierson Wireless, Omaha, NE

- Developed and maintained full-stack web applications in an Agile team.
- Resolved IT support tickets and optimized workstation configurations leading to a reduction in downtime.
- Created user guides and improved onboarding processes, reducing support queries.
- Monitored security systems, improving response times and minimizing data loss.

CDL Driver Safety and Training Specialist *(10/2013 - 05/2022)*
Forward Air Solutions, Omaha, NE

- Operated CDL Class A trucks for 8+ years maintaining a clean driving record.
- Ensured 100% correct log management, contributing to a 99% compliance rating.
- Ensured driver compliance with state, local, and federal transportation regulations through training and evaluation.

PROJECTS

Web Form Application Project

- Developed a responsive web application to streamline data collection using Bootstrap.
- Implemented dynamic form validation with JavaScript and jQuery.
- Improved UX by enabling asynchronous data submission via AJAX.
- Designed and built a PHP backend to store form data in MySQL.

Job Parts and Pricing Tool

- Created a web-based tool integrating user-provided data with live pricing catalogs.
- Designed the system to aid project managers in making data-driven decisions.
- Optimized data analysis by merging stored and real-time information.

Support Ticket CRUD Application

- Developed an IT Support Ticket Management System using Laravel.
- Enabled Create, Read, Update, and Delete (CRUD) functionality for managing support tickets.
- Utilized MySQL for efficient data storage and retrieval.
- Deployed via Azure and implemented CI/CD pipelines with GitHub Actions.
